

Test Probe SMA Female to Trimmed Lead Cable FM-SR086TBJ Coax in 6 Inch

The 50 ohm SMA Female to pre-trimmed lead cable using FM-SR086TBJ coax, part number FMCA2400-6, from Fairview Microwave is in-stock and ships same day. Fairview Microwave's formable cable assemblies provide a convenient alternative to their semi-rigid versions, as they offer similar electrical performance but can be bent to desired shape without the use of special tools.

Fairview's hand formable test probes are convenient ready-to-use probes designed for use in testing microwave circuits. These probes are constructed of high quality hand formable coax and a SMA Female connector. The assemblies come in multiple cable diameters to help when attaching two very fine traces or into tight spaces. There are two versions including straight-cut probe ends for those that would like to customize the dimensions of the center conductor and dielectric dimensions as well as pre-stripped probe ends that are ready for immediate use. Each assembly has been RF tested to ensure VSWR specifications of the assembly are met prior to trimming. Each assembly comes in special packaging to protect the coax and pre-trimmed probe ends.

Custom versions of most RF cable assemblies can be built and shipped same day. Custom cable assembly lengths can be obtained by specifying the desired length on the web site at time of order or by contacting a sales representative. Other available RF cable assembly value added services include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly.
