

Power Detector, 30 MHz to 4 GHz, SMA, Postive Output Slope

The FMPT1001 is a broadband Power Detector module that covers a frequency band from 30 MHz to 4000 MHz. Desirable performance features include a positive output slope with an output voltage response from 0.5 to 2 volts, 80 dB of dynamic range, and a fast pulse response of 2 μ sec typical. The 50 ohm detector design requires a single +5 volt power supply, can handle up to +20 dBm RF input power, and supports Female SMA connectors. The rugged compact package assembly operates over a -40°C to +85°C temperature range and is designed to meet MIL-STD-202 environmental test conditions for Humidity, Shock, Vibration, and Altitude.
