

**WR-12 Waveguide Section 3 Inch Length Straight Using UG-387/U Flange With a 60 GHz to 90 GHz Frequency Range in Instrumentation Grade**

Fairview Microwave carries a wide variety of waveguide sections ranging from WR-12 to WR-137. These waveguide sections include grooved and non-grooved designs. Standard lengths of our waveguide sections include 3", 6", 9", and 12" (custom lengths available upon request). For ease of identification, our commercial grade waveguide sections are painted grey while our instrumentation grade waveguide sections are gold plated. Our instrumentation grade waveguide sections were designed with precision tolerances as tight as ±0.001" and were constructed of a high grade oxygen free copper to ensure repeatable RF performance.
