

**Field Replaceable SMA Frequency
 Divider Divide by 2 Prescaler Module
 Operating from 500 MHz to 18 GHz**

The FMFD2000 is a low noise Divide-by-2 Static Prescaler Module that covers a wide input frequency bandwidth from 0.5 GHz to 18 GHz. The design utilizes advanced GaAs HBT MMIC semiconductor technology that produces low additive SSB phase noise performance with a typical level of -150 dBc/Hz at 100 kHz offset. Additional typical performance includes an output power level of -4 dBm and reverse leakage up to 55 dB. Input/output ports are matched for 50 ohms and are DC blocked. The design requires a single +5V DC supply. The compact drop-in package is RoHS compliant and hermetically sealed with field replaceable SMA connectors. And for added confidence, this rugged package assembly is designed to meet MIL-STD-883 test conditions for Hermeticity and Temperature Cycle.
