

## RF Load 100 Watts High Power To 8 GHz Conduction Cooled Body Black Anodized Aluminum Heatsink SMA Male

High power RF termination (also called RF load or dummy load) SAT8S-100 from Fairview Microwave operates from DC to 8 GHz and handles up to 100 Watts (CW). This SMA termination (or load) has a male gender. SAT8S-100 SMA load termination offers 1.5:1 max VSWR. This high power 100W SMA terminator from Fairview Microwave has a heatsink body which is designed to provide adequate heat dissipation within its full frequency of operation.

RF terminations / loads are critical passive components in many RF, microwave and millimeter wave systems where signal reflection from unused ports can reduce the signal integrity and can potentially damage the device. By terminating an unused port with a matched load (dummy load), the incident energy will be absorbed with minimal reflection. These radio frequency termination components are commonly used to terminate devices such as couplers, circulators, and switches. Loads / terminations are also widely used in measurement systems to ensure accurate results. Fairview offers a large selection of in-stock RF, microwave and millimeter wave terminations up to 65 GHz with great performance over the entire operating range and with power handling capabilities up to 800 Watts (CW).
